Experience

Design & Innovation Teacher

Korea International School – Gyeonggi, South Korea
06/2024 – Present

AP Computer Science Principles, Programming 1 & Robotics

- Teach computational thinking, programming, AI concepts, Swift development, and robotics through hands-on, project-based learning.
- Guide students in exploring algorithms, data, computing systems, and the societal impacts of technology.
- Achieved an **80% AP Computer Science Principles exam pass rate**, with 12 of 15 students earning a score of 3 or higher.
- Develop students' problem-solving, collaboration, and engineering design skills through programming projects and robotic systems.

Video Production & Animation

- Developed a curriculum structured around three studios focused on storytelling through video production and animation, emphasizing the design thinking process.
- Guide students through ideation, scriptwriting, storyboarding, production, and editing, using feedback and reflection to refine their work.

Fashion Design

- Developed and taught a curriculum focused on ethical fashion and fabric manipulation, integrating responsible design practices with creative exploration.
- Guided students through the design thinking process to develop concepts, experiment with materials, and create original designs.

VEX Robotics Coach

- Mentor teams through competitive robotics challenges.
- Foster teamwork, leadership, and project management alongside technical skills.
- Prepare students for success in future STEM pathways.

Computer Science Teacher

MacArthur High School – San Antonio, TX
08/2022 – 08/2024

AP Computer Science Principles, AP Computer Science A, and Computer Science 1 Honors

- Instructed students in Python, Java, and JavaScript.
- Emphasized project-based learning and real-world applications.
- Blended technical rigor with creativity to highlight CS as a tool for innovation.
- Achieved an **60% overall AP Computer Science (Principles & A) exam pass rate**, with 15 of 25 students earning a score of 3 or higher.

Summary

Human-centered builder and systems thinker with a multidisciplinary background in design, technology, communication, education, and data. Experienced in translating complex needs into thoughtful tools, digital experiences, and learning systems that help people understand, connect, and take action. Transitioning from education into industry with a product-minded approach rooted in human-driven innovation: understanding the need, using available resources, building thoughtfully, and improving the experience.

Education

Master's Degree, Public Relations, Advertising & Applied Communication
– *Full Sail University* (2019–2020)

Bachelor of Science, Graphic Design
– *Full Sail University* (2015–2018)

High School Diploma
– *Canutillo High School* (2010–2014)

Certifications

- Information Technology Security (ITS) Java – Certiport

- PCEP-30-02 Certified Entry-Level Python Programmer – Python Institute

- Computer Science 8–12 – Texas Education Agency

- Technology Applications EC–12 – Texas Education Agency

Languages

English: Native
Spanish: Native

Student Development
- Strengthened problem-solving, computational thinking, and independence as well as built student confidence as innovators and critical thinkers.

Athletics Coach
- Coached hurdles in track and field, fostering teamwork, discipline, and resilience.

Design Teacher

Cooper High School – Abilene, TX
06/2021 – 06/2022

Design, Animation, and Audio/Video Production
- Built student skills in creative media and digital storytelling.
- Introduced video game design and development, from storyboarding to final programming and play testing.

3D modeling and Animation Projects
- Enabled students to create immersive environments and characters.
- Used Unity and C# to program mechanics such as player movement, scoring systems, and interactive levels.
- Highlighted the intersection of art and computer science in creating engaging digital experiences.

Emphasized collaboration and problem-solving
- Fostered teamwork through peer feedback and iterative design cycles.
- Encouraged application of skills to real-world contexts, including educational games and simulations.
- Strengthened student critical thinking about technology's role in addressing challenges.

Advertising & Media Specialist

DeFNiC Software – Abilene, TX
01/2020 – 06/2022

Digital Marketing Strategy
- Executed multi-channel campaigns across social media and Google Ads, increasing qualified leads by 35%.
- Drove a 30% increase in engagement through targeted campaigns.

Analytics & Optimization
- Leveraged analytics to reduce cost-per-click by 20% while expanding reach.

Customer Relationship Management
- Improved client retention by 30% through CRM-driven engagement strategies.

Creative Art Director

The River of Life Church – Abilene, TX
07/2019 – 05/2021

Branding & Creative Direction
- Oversaw branding, media, and digital storytelling for multi-platform outreach.
- Directed a small media team to ensure consistency across deliverables.

Skills

- Global Education | Curriculum Design | Program Development

- Human-Centered Design | Emerging Tech Integration | AI in Education

- Digital Fluency | Strategic Planning | Engineering | Robotics

- Programming (Python, Java, JavaScript, Swift, C#)

Key Achievements

- Worked collaboratively with faculty to design and implement a unified Design & Innovation pathway program at Korea International School, aligning curriculum across courses and fostering a cohesive, student-centered learning ecosystem

- Drove consistent AP exam success, with 80% of students achieving passing scores and a high rate of 5s each testing cycle

- Led our robotics team (as a head coach) to Top 4 in national competition in the first year. Have since demonstrated program growth and increased student engagement

- Boosted social media engagement for The River of Life Church by 40% in one year which led to increased church membership

Digital Media & Engagement

- Produced broadcast-quality live-streaming and multimedia projects, expanding audience reach globally.
- Strengthened online presence across social, print, and digital campaigns.

Collaboration & Project Management

- Coordinated with leadership and volunteers to align creative strategies with goals.
- Managed content calendars and multi-channel outreach.
